The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/687,524

Applicant(s)

ENGSTROM ET AL.

Examiner

Raymond S. Dean

Art Unit

2618

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3,6-11 and 14-17 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3,6-11 and 14-17 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 15 October 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 27, 2007 has been entered.

Response to Arguments

2. Applicant's arguments with respect to claims 1, 9 have been considered but are moot in view of the new ground(s) of rejection.

Yach further teaches the displaying including displaying representations of the communication messages of the list (Figures 15a, 15b, Section 0117); receiving by the wireless mobile communication device, a second user request from the same or another input key of the wireless mobile communication device selecting a representation of one of the communication messages of the list (Figure 2b, Section 0121 lines 27 – 35); and in response to said receiving the second request, displaying, by the wireless mobile communication device, a list of selectable entries associated with multiple communication protocols to facilitate the user in selecting a communication protocol, and facilitating, by the wireless mobile communication device, reply to the

Art Unit: 2618

communication message in the selected communication protocol (Figure 2b, Section 0121 lines 22 – 35, there are a plurality of communication protocols such as email, SMS, cellular calls).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3, 6 – 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cermak et al. (US 6,763,095) in view of Yach et al. (US 2002/0128036).

Consider Claim 1. Cermak teaches in a wireless mobile communication device, a method of operation (Col. 2, lines 38-53, Abstract) comprising: receiving a first user request from an input key of the wireless mobile communication device (Col. 5, lines 1-13, lines 29-39, Col. 2, lines 9-29, lines 38-52, particularly lines 42-45); and in response, displaying on a display of the wireless mobile communication device (Col. 4, lines 1-37, Col. 5, lines 1-39), a list of communication messages with a communication partner of at least two message types selected from a message type group comprising of an email message type, a text message type, a voice message type, and a call message type (Col. 7, lines 35-44), where an icon is displayed when a new message has arrived, either a voice message or a text message.

Cermak does not teach a list of communication messages to and from a communication partner and the displaying including displaying representations of the communication messages of the list; receiving by the wireless mobile communication device, a second user request from the same or another input key of the wireless mobile communication device selecting a representation of one of the communication messages of the list; and in response to said receiving the second request, displaying, by the wireless mobile communication device, a list of selectable entries associated with multiple communication protocols to facilitate the user in selecting a communication protocol, and facilitating, by the wireless mobile communication device, reply to the communication message in the selected communication protocol.

Yach teaches a list of communication messages to and from a communication partner (Section 0117), the displaying including displaying representations of the communication messages of the list (Figures 15a, 15b, Section 0117); receiving by the wireless mobile communication device, a second user request from the same or another input key of the wireless mobile communication device selecting a representation of one of the communication messages of the list (Figure 2b, Section 0121 lines 27 – 35); and in response to said receiving the second request, displaying, by the wireless mobile communication device, a list of selectable entries associated with multiple communication protocols to facilitate the user in selecting a communication protocol, and facilitating, by the wireless mobile communication device, reply to the communication message in the selected communication protocol (Figure 2b, Section

Art Unit: 2618

0121 lines 22 – 35, there are a plurality of communication protocols such as email, SMS, cellular calls).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Cermak with the unified event listing functionality of Yach for the purpose of keeping track of all different types events that take place on the mobile device as taught by Yach.

Consider Claim 3, in regards to claim 1, respectively, above. Cermak teaches the method wherein the method of operation, further comprising receiving a second user request from the same or another input key of the wireless mobile communication device (Col. 5, lines 1-13, lines 29-39); and in response, expanding the display of a selected one of the displayed communication messages from the communication partner (Col. 4, lines 15-25, Col. 5, lines 9-13, Col. 6, lines 58-67, Col. 7, lines 1-34).

Consider Claim 6, in regards to claim 1, respectively, above. Cermak teaches the method wherein said displaying comprises displaying the list of communication messages with at least three message types selected from the message type group comprising of the email message type (Col. 5, lines 1-13, Col. 6, lines 3-25, Col. 7, lines 5-21, Col. 8, lines 21-32), the text message type (Col. 6, lines 15-20, Col. 2, lines 9-21, Col. 7, lines 40-44), the voice message type (Col. 7, lines 23-62, Col. 4, lines 20-24, Col. 2, lines 9-21), and the call message type (Col. 7, lines 23-34, Col. 5, lines 29-39, Col. 4, lines 34-37).

Consider Claim 7, in regards to claim 1, respectively, above. Cermak teaches the method wherein said displaying comprises displaying the list of communication

Art Unit: 2618

messages with at least four message types comprising the email message type (Col. 5, lines 1-13, Col. 6, lines 3-25, Col. 7, lines 5-21, Col. 8, lines 21-32), the text message type (Col. 6, lines 15-20, Col. 2, lines 9-21, Col. 7, lines 40-44), the voice message type (Col. 7, lines 23-62, Col. 4, lines 20-24, Col. 2, lines 9-21), and the call message type (Col. 7, lines 23-34, Col. 5, lines 29-39, Col. 4, lines 34-37).

Consider Claim 8, in regards to claim 1, respectively, above. Cermak teaches the method wherein said displaying comprises displaying text messages across different chat sessions (Col. 6, lines 15-20, Col. 2, lines 9-21, lines 38-65, Col. 7, lines 40-44).

5. Claims 9, 11, 14 – 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cermak et al. (US 6,763,095) in view of Smith et al. (US 6,333,973) and in further view of Yach et al. (US 2002/0128036).

Consider Claim 9. Cermak et al. teaches a wireless mobile communication device (Col. 2, lines 38-53, Abstract) comprising: a transceiver to facilitate sending and receiving communication messages of a plurality of message types to and from a communication partner (Col. 2, lines 38-58, Col. 4, lines 1-37), where a system includes a user terminal that may be a cellular phone for incoming and outgoing communications, such as for a user to leave a message and receive a message; a display (Col. 4, lines 18-21, lines 31-37, Col. 2, lines 9-15, lines 38-53, Col. 5, lines 29-39, Col. 6, lines 43-57); an input device (Col. 2, lines 38-53, Col. 8, lines 41-59, particularly lines 50-52); and an unified message function to render on the display, in response to a first input inputted using the input device (Col. 4, lines 1-37, Col. 5, lines

Art Unit: 2618

1-39), a list of communication messages from the communication partner of at least two message types selected from a message type group comprising of an email message type, a text message type, a voice message type, and a call message type (Col. 7, lines 35-44), where an icon is displayed when a new message has arrived, either a voice message or a text message.

Cermak does not teach a list of communication messages to and from the communication partner, the list only having communication messages sent to and received from the communication partner, and not having any other communication messages to and from any other communication partners, the rendering including rendering on the displaying representations of the communication messages of the list; receive a second user request from the same or another input device selecting a representation of one of the communication messages of the list; and in response to said receiving the second request, render on the display a list of selectable entries associated with multiple communication protocols to facilitate the user in selecting a communication protocol, and facilitate reply to the communication message in the selected communication protocol.

Smith teaches a list only having communication messages sent to or received from the communication partner, and not having any other communication messages to or from any other communication partners (Col. 8 lines 11 – 16, lines 26 – 33, lines 45 – 48, the messages can be all types of messages, since the messages can be arranged by sender the user can view all types of messages from a particular sender).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Cermak with the message functionality of Smith for the purpose of integrating different types of messages such that a user may view and respond to the messages by simple operation as taught by Smith.

Yach teaches a list of communication messages to and from the communication partner (Section 0117) and the rendering including rendering on the displaying representations of the communication messages of the list (Figures 15a, 15b, Section 0117); receive a second user request from the same or another input device selecting a representation of one of the communication messages of the list (Figure 2b, Section 0121 lines 27 – 35); and in response to said receiving the second request, render on the display a list of selectable entries associated with multiple communication protocols to facilitate the user in selecting a communication protocol, and facilitate reply to the communication message in the selected communication protocol (Figure 2b, Section 0121 lines 22 – 35, there are a plurality of communication protocols such as email, SMS, cellular calls).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the system of Cermak in view of Smith with the unified event listing functionality of Yach for the purpose of keeping track of all different types events that take place on the mobile device as taught by Yach.

Consider Claim 11, in regards to claim 9, respectively, above. Cermak teaches the method wherein the method of operation, further comprising receiving a second user request from the same or another input key of the wireless mobile communication

Art Unit: 2618

device (Col. 5, lines 1-13, lines 29-39); and in response, expanding the display of a selected one of the displayed communication messages from the communication partner (Col. 4, lines 15-25, Col. 5, lines 9-13, Col. 6, lines 58-67, Col. 7, lines 1-34).

Consider Claim 14, in regards to claim 9, respectively, above. Cermak teaches the method wherein said displaying comprises displaying the list of communication messages with at least three message types selected from the message type group comprising of the email message type (Col. 5, lines 1-13, Col. 6, lines 3-25, Col. 7, lines 5-21, Col. 8, lines 21-32), the text message type (Col. 6, lines 15-20, Col. 2, lines 9-21, Col. 7, lines 40-44), the voice message type (Col. 7, lines 23-62, Col. 4, lines 20-24, Col. 2, lines 9-21), and the call message type (Col. 7, lines 23-34, Col. 5, lines 29-39, Col. 4, lines 34-37).

Consider Claim 15, in regards to claim 9, respectively, above. Cermak teaches the method wherein said displaying comprises displaying the list of communication messages with at least four message types comprising the email message type (Col. 5, lines 1-13, Col. 6, lines 3-25, Col. 7, lines 5-21, Col. 8, lines 21-32), the text message type (Col. 6, lines 15-20, Col. 2, lines 9-21, Col. 7, lines 40-44), the voice message type (Col. 7, lines 23-62, Col. 4, lines 20-24, Col. 2, lines 9-21), and the call message type (Col. 7, lines 23-34, Col. 5, lines 29-39, Col. 4, lines 34-37).

Consider Claim 16, in regards to claim 9, respectively, above. Cermak teaches the method wherein said displaying comprises displaying text messages across different chat sessions (Col. 6, lines 15-20, Col. 2, lines 9-21, lines 38-65, Col. 7, lines 40-44).

Consider Claim 17, in regards to claim 9 above. Cermak teaches the wireless mobile communication device wherein the wireless mobile device comprises a wireless mobile phone (Col. 2, lines 42-44).

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cermak et al. (US 6,763,095) in view of Yach et al. (US 2002/0128036), as applied to Claim 1 above, and further in view of Kaaresoja et al. (US 2002/0177471)

Consider Claim 2, in regards to claim 1, respectively, above. Cermak in view of Yach does not teach the method wherein the displaying comprises displaying on the display for a communication message, a pictorial icon depicting the communication partner of the communication message.

Kaaresoja teaches displaying on the display for a communication message, a pictorial icon depicting the communication partner of the communication message (Section 0018).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the mobile phone of Cermak in view of Yach with the visual icon functionality of Kaaresoja for the purpose of enriching the communication experience of the user as taught by Kaaresoja.

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cermak et al. (US 6,763,095) in view of Smith et al. (US 6,333,973) in view of Yach et al. (US

Art Unit: 2618

2002/0128036), as applied to Claim 9 above, and further in view of Kaaresoja et al. (US 2002/0177471)

Consider Claim 10, in regards to claim 9, respectively, above. Cermak in view of Smith and in further view of Yach does not teach the method wherein the displaying comprises displaying on the display for a communication message, a pictorial icon depicting the communication partner of the communication message.

Kaaresoja teaches displaying on the display for a communication message, a pictorial icon depicting the communication partner of the communication message (Section 0018).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the mobile phone of Cermak in view of Smith and in further view of Yach with the visual icon functionality of Kaaresoja for the purpose of enriching the communication experience of the user as taught by Kaaresoja.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond S. Dean whose telephone number is 571-272-7877. The examiner can normally be reached on Monday-Friday 6:00-2:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F. Urban can be reached on 571-272-7899. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
